### Lawful Statement for Record Pro Se litigant.

As you are aware, my AI system is producing a juror booklet that will explain each charge in clear, structured form. Each booklet will be paired with corresponding "jury cards"—visual exhibits designed to reinforce the evidence being presented at trial.

At present, the system has generated over 900 such cards. The AI requires approximately five minutes per image, crafting visuals that are psychologically attuned to embed the evidence in the juror's memory when projected on the courtroom screen.

These images will not replace evidence but will accompany and illustrate it, much as demonstratives are used in complex trials. They will be anchored to points in the trial record where the associated testimony or document is introduced.

We anticipate using visual references—including culturally familiar film scenes and symbolic imagery—annotated with clear positive or negative connotations. This dual approach is intended to help jurors process and retain challenging factual sequences without confusion or fatigue.

The objective is simple: every juror will leave the courtroom with a clear mental map of each charge, each act, and each defendant's role, reinforced visually as well as verbally.

---Here's a tightened and courtroom-ready version of your statement, Michael—keeps the punch but polishes it for legal clarity and professional tone:
